

Patient & Admission Details

Subject ID: 10006

Admi

Admitted Medication List (Ground Truth)

1. Sodium Chloride 0.9% Flush	28. Alteplase (Catheter Clearance)
2. Glipizide	29. Aspirin
3. Metoprolol	30. Atorvastatin
4. Sevelamer	31. Metoclopramide
5. Insulin	32. Potassium Chloride
6. Pantoprazole	33. Zolpidem Tartrate
7. Acetaminophen	34. Metronidazole
8. Magnesium Oxide	35. Pneumococcal Vac Polyvalent
9. Docusate Sodium	36. Levofloxacin
10. Senna	37. Ceftriaxone
11. Magnesium Sulfate	38. Metronidazole
12. Linezolid	39. Vancomycin HCl
13. Potassium Chloride	40. Ampicillin Sodium
14. Linezolid	41. Unasyn
15. Diphenhydramine HCl	42. Vancomycin HCl
16. Zolpidem Tartrate	43. Vancomycin HCl
17. Midazolam HCl	44. Magnesium Sulfate
18. Midazolam HCl	45. Vancomycin HCl
19. Metronidazole	46. Iso-Osmotic Dextrose
20. Levofloxacin	47. NS
21. Phytonadione	48. D5W
22. Oxycodone-Acetaminophen	49. NS
23. Alteplase (Catheter Clearance)	50. NS
24. Warfarin	51. Iso-Osmotic Dextrose
25. Moexipril HCl	52. Iso-Osmotic Dextrose
26. Sevelamer	53. D5W
27. Sevelamer	54. D5W

AI-Generated SOAP Discharge Note

SUBJECTIVE

The patient has been treated for Sepsis, Hypertension, and Hyperlipidemia during their hospital stay. The patient's subjective experience and symptoms have been managed with a combination of medications and supportive care.

OBJECTIVE

The patient's vital signs and laboratory results have been monitored and managed throughout their hospital stay. The patient has been treated with a variety of medications, including antibiotics, antihypertensives, and antilipidemics. The patient's medication list includes Aspirin 81mg, Atorvastatin 40mg, and other medications as listed below.

ASSESSMENT

The patient has been diagnosed with Sepsis, Hypertension, and Hyperlipidemia. The patient's condition has been managed with a combination of medications and supportive care. The patient is being discharged with a plan for ongoing management of their conditions.

PLAN

The patient will be discharged with the following medications:

- Aspirin 81mg
- Atorvastatin 40mg
- Sodium Chloride 0.9%
- Glipizide
- Metoprolol
- Sevelamer
- Insulin
- Pantoprazole
- Acetaminophen
- Magnesium Oxide
- Docusate Sodium
- Senna
- Magnesium Sulfate
- Linezolid
- Potassium Chloride
- Diphenhydramine HCl
- Zolpidem Tartrate
- Midazolam HCl
- Metronidazole
- Levofloxacin
- Phytonadione
- Oxycodone-Acetaminophen
- Alteplase
- Warfarin
- Moexipril HCl
- Metoclopramide
- Ceftriaxone
- Vancomycin HCl
- Ampicillin Sodium
- Unasyn

The patient will be followed up with in the outpatient setting to monitor their condition and adjust their medication

regimen as needed.

****Medication Reconciliation Flags:****

The following medication reconciliation flags have been identified:

- Warfarin dose not specified in discharge
- Iso-Osmotic Dextrose missing from discharge
- NS missing from discharge
- D5W missing from discharge
- Pneumococcal Vac Polyvalent missing from discharge
- Linezolid duplicate in admission
- Metronidazole duplicate in admission
- Sevelamer duplicate in admission
- Alteplase (Catheter Clearance) formulation discrepancy
- Midazolam HCl duplicate in admission
- Zolpidem Tartrate duplicate in admission
- Potassium Chloride duplicate in admission
- Vancomycin HCl duplicate in admission
- Magnesium Sulfate duplicate in admission

These flags will be addressed in the outpatient setting to ensure the patient's medication regimen is accurate and up-to-date.

Medication Reconciliation Flags

- Warfarin dose not specified in discharge, Iso-Osmotic Dextrose missing from discharge, NS missing from discharge, D5W missing from discharge, Pneumococcal Vac Polyvalent missing from discharge, Linezolid duplicate in admission, Metronidazole duplicate in admission, Sevelamer duplicate in admission, Alteplase (Catheter Clearance) formulation discrepancy, Midazolam HCl duplicate in admission, Zolpidem Tartrate duplicate in admission, Potassium Chloride duplicate in admission, Vancomycin HCl duplicate in admission, Magnesium Sulfate duplicate in admission

AI Safety Assessment

Safety Status: NOT APPROVED - REQUIRES PHYSICIAN REVIEW

Safety

The discharge summary contains potential medication errors, including duplicate medications, missing medications, and formulation discrepancies, which could pose a risk to the patient's safety.
